BUSINESS EDUCATION WITH *Denise Leigh*

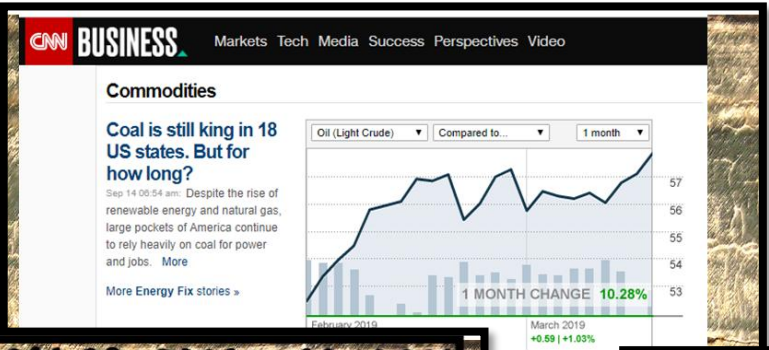

This International Business activity is a fabulous way to teach about commodities.

- ❖ Students search and research leading commodities on each continent.
- ❖ Students also learn the different kinds of commodities - energy, metals, meats and livestock, agricultural, and consumer.

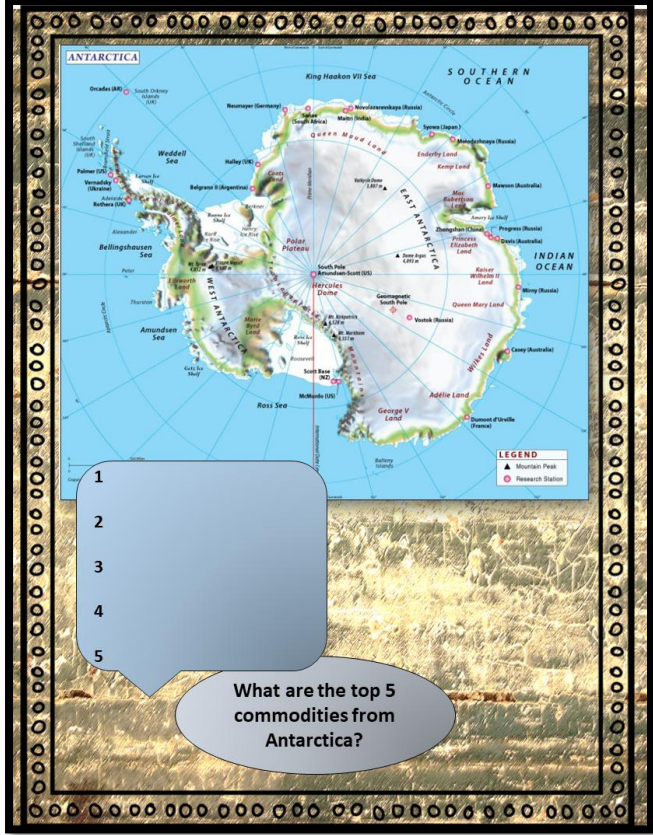

What is a Commodity
 A commodity is a basic good used in commerce that is interchangeable with other commodities. Commodities are used as inputs in the production of other commodities or services. Commodities are essential to the economy. When they are traded, they are traded on a minimum price basis.

Analyze and Categorize the Commodities

Go back in your activity and change the color of the commodities with the appropriate color to classify them.

- *Change the color of the commodities that are energy commodities to **DARK BLUE**
- *Change the color of the commodities that are metals to **DARK GRAY**
- *Change the color of the commodities that are agricultural commodities to **DARK GREEN**
- *Change the color of the commodities that are meat and livestock to **DEEP YELLOW**
- *Change the color of the commodities that are consumer commodities **DARK RED**
